REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

There was no prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 1, 3, 11, 15, 22, and 23.

As to claims 1, 3, 11 and 22, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“adjusting the relative and overall intensity of orthogonal polarization components of a laser source at a first detector positioned at a first angle with respect to the laser beam axis so the first detector has the same sensitivity to polarization as a second detector positioned at a second angle with respect to the laser beam axis, forming a corrected signal, wherein said first angle and second angle are not equal”**, in combination with the rest of the limitations of claims 1, 3, 11 and 22.

As to claim 15, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“means for adjusting the adjustable polarizing element and the gain element so that the noise detected at the scattering light detector is reduced”**, in combination with the rest of the limitations of claim 15.

As to claim 23, the prior art of record, taken alone or in combination, fails to disclose or render limitations **"automatically adjusting either the relative or overall intensity of orthogonal polarization components so that the noise level is reduced"**, in combination with the rest of the limitations of claim 23.
